PATENT APPLICATION

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re application of

Docket No: Q88617

Fabio STRADELLA, et al.

Appln. No.: 10/542,507

Group Art Unit: 3754

Confirmation No.: 5920

Examiner: Unknown

Filed: February 13, 2006

For: DOSAGE INDICATOR FOR A DEVICE DISPENSING A FLUID PRODUCT

**SUBMISSION OF INTERNATIONAL PRELIMINARY
EXAMINATION REPORT (IPER)**

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450
Sir:

For the Examiner's convenience, enclosed herewith is a copy of the English translation of the International Preliminary Examination Report (IPER). It is noted that the three references cited in the International Search Report were previously submitted to the U.S. Patent and Trademark Office with an Information Disclosure Statement on July 15, 2005, and are therefore not enclosed herewith.

Respectfully submitted,

Raja N. Saliba

1. Transmission de la traduction au déposant.

☐

Le Bureau international transmet ci-joint copie de la traduction en langue anglaise du rapport préliminaire international sur la brevetabilité (chapitre I).

☒

Le Bureau international transmet ci-joint copie de la traduction en langue anglaise du rapport préliminaire international sur la brevetabilité (chapitre II).

2. Transmission d'une copie de la traduction aux offices désignés ou élus.

Le Bureau international notifie au déposant qu'une copie de cette traduction a été transmise aux offices désignés ou élus suivants qui exigent la traduction en question:

KR

Les offices désignés ou élus suivants ayant renoncé à l'exigence selon laquelle la transmission doit être effectuée à cette date recevront une copie de cette traduction du Bureau international seulement à leur demande:

AE, AG, AL, AM, AP, AT, AU, AZ, BA, BB, BG, BR, BW, BY, BZ, CA, CH, CN, CO, CR, CU, CZ, DE, DK, DM, DZ, EA, EC, EE, EG, EP, ES, FI, GB, GD, GE, GH, GM, HR, HU, ID, IL, IN, IS, JP, KE, KG, KP, KZ, LC, LK, LR, LS, LT, LU, LV, MA, MD, MG, MK, MN, MW, MX, MZ, NA, NI, NO, NZ, OA, OM, PG, PH, PL, PT, RO, RU, SC, SD, SE, SG, SK, SL, SY, TJ, TM, TN, TR, TT, TZ, UA, UG, US, UZ, VC, VN, YU, ZA, ZM, ZW

3. Rappel concernant la traduction dans la ou l'une des langues officielles de l'office ou des offices élus.

Il est rappelé au déposant que, lorsqu'une traduction de la demande internationale doit être remise à un office élu, cette traduction doit comporter la traduction de toute annexe du rapport préliminaire international sur la brevetabilité (chapitre II).

Il appartient au déposant d'établir la traduction en question et de la remettre directement à chaque office élu intéressé dans le délai applicable (règle 74.1). Voir le volume II du Guide du déposant du PCT pour de plus amples renseignements.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/EP2004/000346

Box No. I Basis of the report

1. With regard to the language, this report is based on the international application in the language in which it was filed, unless otherwise indicated under this item.

- ☐ This report is based on translations from the original language into the following language _____ which is the language of a translation furnished for the purposes of:
- ☐ international search (Rule 12.3 and 23.1(b))
 - ☐ publication of the international application (Rule 12.4)
 - ☐ international preliminary examination (Rule 55.2 and/or 55.3)

2. With regard to the elements of the international application, this report is based on (replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report):

- ☐ the international application as originally filed/furnished
- ☒ the description:

pages 1-10 _____ as originally filed/furnished

pages* _____ received by this Authority on _____

pages* _____ received by this Authority on _____

- ☒ the claims:
- nos. _____ as originally filed/furnished

nos.* _____ as amended (together with any statement) under Article 19

nos.* 1-19 _____ received by this Authority on 10.11.2004 with the letter

filed on 08.11.2004

nos.* _____ received by this Authority on _____

- ☒ the drawings:
- sheets 1/4-4/4 _____ as originally filed/furnished

sheets* _____ received by this Authority on _____

sheets* _____ received by this Authority on _____

- ☐ a sequence listing and/or any related table(s) – see Supplemental Box Relating to Sequence Listing.

3. ☐ The amendments have resulted in the cancellation of:

☐ the description, pages _____

☐ the claims, nos. _____

☐ the drawings, sheets/figs _____

☐ the sequence listing (specify): _____

☐ any table(s) related to sequence listing (specify): _____

4. ☐ This report has been established as if (some of) the amendments annexed to this report and listed below had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).

☐ the description, pages _____

☐ the claims, nos. _____

☐ the drawings, sheets/figs _____

☐ the sequence listing (specify): _____

☐ any table(s) related to sequence listing (specify): _____

* If item 4 applies, some or all of those sheets may be marked "superseded."

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/EP2004/000346

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability;
citations and explanations supporting such statement

1. Statement

Novelty (N)	Claims	6-16, 18, 19	YES
	Claims	1-5, 17	NO
Inventive step (IS)	Claims	13-16	YES
	Claims	1-12, 17-19	NO
Industrial applicability (IA)	Claims	1-19	YES
	Claims		NO

2. Citations and explanations (Rule 70.7)

1. Reference is made to the following documents:

D1: GB-A-1 336 014 (METTOY CO LTD) 7 November 1973
(1973-11-07);

D2: WO 96/39337 A (SENETICS INC) 12 December 1996
(1996-12-12);

D3: WO 01/37909 A (HOERLIN ERNST; ERNST HOERLINS
INGENJOERSBYRAA (SE)) 31 May 2001 (2001-05-31).

2. New claims filed on 08.11.2004

2.1 The claims filed on 08.11.2004 add the following
features to claim 1:

2.1.1 "..., and in that the indicator includes actuation
means comprising two flexible elements having
different degrees of flexibility, with the more
flexible element allowing said rotary metering
wheel to rotate at the start of the actuation
stroke of the dispensing device, while the less

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
	<p>flexible element allows said actuation stroke to be continued following rotation of said metering wheel."</p> <p>2.1.2 This amendment to claim 1 is contrary to the provisions of PCT Article 34 (2) (b) because the addition of these features causes the subject matter of the application to be extended beyond the content of the application as filed. Indeed, this amendment is not supported by the description as originally filed. More precisely, on page 8, line 9, of the description, the expression "at least" applies to the expression "a flexible tab" and the expression "having two different degrees of flexibility" applies to the expression "two flexible portions". It follows that reference cannot be being made to "at least one drive element" as the amendment submitted on 08.11.2004 appears to suggest.</p> <p>2.1.3 It follows that this amendment (i.e. the passage in point 2.1.1) has not been taken into consideration when establishing the international preliminary report. It should, therefore, be noted that the claims which are examined herein are the same as the claims which were filed originally.</p> <p>3. Novelty (PCT Article 33(2)):</p> <p>3.1 Document D1 describes (the references between parentheses apply to said document; see, in</p>

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

particular, figures 1 and 2 and page 1, line 80 to page 2, line 33):

an indicator comprising a rotatable metering wheel (4) and a translatable member (8), which metering wheel comprises indicating means (figure 1) in cooperation with a display opening (12) in said translatable member (8) and a hollow profile member (7) in engagement with a projection (9) on said translatable member (8), wherein the shape of said hollow profile member (7) is such that at least some revolutions of said rotatable metering wheel (4) cause translation of said translatable member (8), thereby modifying the position of said translatable member (8) in relation to said metering wheel (4).

In a fluid-dispensing device, an indicator of this kind is suitable for indicating the number of doses already dispensed or still to be dispensed.

It follows that the subject matter of **claim 1** is not novel.

3.2 Similarly, the subject matter of **claims 2-5 and 17** is disclosed in D1, page 2, lines 14 and 28-34 and is, consequently, not novel.

4. **Inventive step (PCT Article 33(3)):**

4.1 Even if the applicant has doubts with regard to

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

the above arguments concerning novelty (see point 3.1), it should be noted that the subject matter of claim 1 cannot, under any circumstances, be considered to be inventive.

- 4.2 **Dependent claims 6-12** do not appear to contain any features which, in combination with the features in any one of the claims to which they refer, might define subject matter that fulfils the PCT requirement of inventive step. For example, in order to solve the same problems, document D2 (see figures 8-11 and page 39, line 25 to page 44, line 19) describes, in general, a system for counting the doses already dispensed and, in particular, the features in claims 6-12.

- 4.3 Document D3 describes (the references between parentheses apply to said document; see, in particular, figures 4, 5 and 7 and page 11, lines 4-31):

a fluid-dispensing device (1) comprising a fluid container (4), a dispensing member (see figure 7) such as a pump or a valve mounted on said container (4), and a dose indicator (2).

Regardless of its size, such a device is not suitable for indicating a large number of doses.

In D1, this problem is solved by virtue of an indicator corresponding to the one in claim 1, as mentioned in point 2.1.

Box No. V

Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

A person skilled in the art, faced with this problem, would use the teaching of D1 in combination with that of D3 and thereby arrive at the subject matter of claim 18.

As a result, the subject matter of **claim 18** does not involve an inventive step.

- 4.4 **Claim 19** does not appear to contain any features which, in combination with the features in claim 18, might define subject matter that fulfils the PCT requirement of inventive step.

5. **The features in claim 13 are, in combination with the features in the claims on which it is dependent, novel and inventive, for the following reasons:**

The indicator actuation means comprise a flexible tab consisting of two portions having different degrees of flexibility, and the actuation tooth on the indicator wheel is supported on the first more flexible portion of said tab, with the result that the indicator can be actuated during the first part of the dose dispenser stroke and the dispenser nevertheless has sufficient freedom of movement to enable a dose to be dispensed properly.

These features are not described or suggested in the available prior art.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No.

PCT/EP2004/000346

Box No. V	Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
5.1	Claims 14-16 are dependent on claim 13 and, as such, therefore also fulfil the PCT requirements of novelty and inventive step.
